ABOUT US

California Label Products Inc. (CLP) was established in 1998 as a joint venture with West Coast packaging supply leader, California Supply Inc., founded in 1970. Today, CLP provides labeling solutions, brand development/protection, and printing systems to customers throughout North America, Asia, and Latin America. CLP's products are used by apparel, footwear, logistics, cannabis, food, beverage, and cosmetics companies for brand communication and product identificaion. The company's in-house design team excels in finding creative branding solutions for customers while CLP's entire production team is dedicated to product quality and color management. CLP differentiates itself by having factory-trained technicians with expertise in multiple hardware and software platforms, allowing CLP to offer and support a diverse variety of in-plant printing solutions.

CANNABIS LABELS & PACKAGING

CLP provides label and packaging solutions for all type of cannabis and CBD products. Certain states require specific recreational & medical marijuana information to be printed on cannabis compliant labels. CLP has many options to help you meet state requirements. We provide stock Medical Cannabis Labels as well as custom printed labels with your logo/artwork.

IN-HOUSE PRODUCTION
2,000 minimum
1 week for sampling, 2 weeks for production

Packaging

We supply new budding vendors and existing dispensaries with packaging for medical marijuana

Products include:
- Mylar bags
- Pop-top bottles
- Concentration containers
- Parchment paper

Adhesive Labels

Whether you're looking for marijuana state compliance warning labels or a custom sticker to brand your package, CLP provides great quality adhesive labels with quick turn-around times. Using an inkjet printer with a knife-cut finish, we are able to print high quality 4-color process custom shaped labels without a die charge.

CALIFORNIA LABEL PRODUCTS
Brand Identity | Label Solutions

FLEXO & OFFSET PRINTED LABELS

Flexo labels matches Pantone inks to achieve top quality color and print. Materials can be used to die cut into custom shapes and sizes. Different materials and finishes include removable or permanent adhesive, gloss or matte surface, BOPP (refrigeration safe), and fabric safe adhesive. Spot UV and foil stamping are also available.

Our production capabilities include an 8-color flexographic press, spot UV, foil stamping, digital 4-color printing, die-cutting, digital cutting, and lamination. We have access to a variety of face sheets including paper and film, that can be combined with standard or specialized adhesives.

DIGITALLY PRINTED LABELS

Inkjet/Digitally printed labels is an inexpensive option that is great for smaller runs. The labels are digitally printed using 4-Color-Process (CMYK), making it a viable option for artwork that is not spot color based, (i.e. gradients, photographs, etc). Custom die shapes and sizes are also available with quick production turnaround times.

There are a variety of ground materials with permanent adhesive available for print which include: white semi-gloss paper, white matte paper, clear BOPP, white BOPP, silver BOPP and holographic substrates. Finish off your label with extra protection by adding a clear gloss laminate, or a matte laminate.

AFINIA DIGITAL PRINTERS

CLP offers Afinia branded digital printer to help boost your brand recognition, and bring your production in-house. Afinia printers are perfect for small to medium production runs. You can pair it with an Afinia finisher to slit, cut, & laminate custom shapes without any dies. Bring production in-house to lower production cost to a minimum.

AFINIA LABEL®
In-House, On-Demand Color Label Printers

Powered by memjet

Afinia L801 Color Label Printer

The Afinia L801 Color Label Printer, powered by Memjet Technology, delivers high-impact, full-color output at 12 inches per second (60ft/min) for just pennies a label. High-quality labels improve brand recognition and allow your products to stand out from the competition. In addition, printing labels in-house offers many benefits to your business:

- Eliminate inventory of preprinted labels
- Eliminate waste by printing labels as needed
- Print variable content, date codes, in real time
- No minimum order quantities
- Make immediate changes to label content
- New revenue possibilities with private and custom labeling

Afinia L901 Industrial Color Label Printer

The L901 combines industrial design, exceptional image quality, and high production speeds with the ability to service and maintain printhead "on-the-fly". This printer is perfect for long roll-to-roll print jobs or inline integration with label finishers, applicators, and dispensers.

- Designed for easy integration with presses/finishers, roll-to-roll, and print & apply
- On-the-fly print head servicing
- Lower cost per print with new optimized CMYKK ink formula
- High speed & resolution

CALIFORNIA LABEL PRODUCTS

AFINIA DIGITAL PRINTERS

Afinia LT5C CMYK + White Label Printer

The Afinia The LT5C CMYK + white label printer offers professional five-color output for a wide variety of markets. Whether it's high-durability labels, freezer and cold-storage labels, food and beverages, or household goods—the LT5C from Afinia Label can deliver that and more.

- Eliminate inventory of preprinted labels
- Eliminate waste by printing labels as needed
- Print with white
- LED dry toner technology
- Fully-waterproof print durability
- New revenue possibilities with private and custom labeling

Afinia L502/ F502 Industrial Color Label Printer

The L502/F502 is the next evolution of the popular mid-range L501 label printer. All-steel industrial design, improved toolbox functionality, over 2x faster printing, and optional durable pigment inks make the L502/F502 extremely rugged and versatile.

- Print vibrant & colorful labels with dye-based inks
- Use pigment inks for water, abrasion, & UV resistance
- Industrial steel construction
- Flexibility to change label designs and content on the fly
- Best for short to mid-sized print runs
- Print fan-folded stock (F502)

Afinia L301 Color Label Printer

Creating professional labels on demand is easy with the L301. Bringing short-run label printing in-house saves time and money. Eliminate lead times, setup fees, plate changing fees, and order quantity minimums associated with outsourcing labels. The L301's continuous roll printing capability allows businesses to print professional-quality labels as needed. No more wasted time, wasted money, or wasted labels.

- Professional looking labels, on demand
- Simplify workflows, eliminate the hassles of sheet printing
- Flexibility to change label designs & content
- Minimize waste by printing only the labels you need
- Economically priced specifically for small businesses

Brand Identity | Label Solutions

AFINIA DIGITAL PRINTERS

Afinia now has more printer options than ever before to cover an even wider range of applications. These include higher volume printing and more difficult substrates. Two of its newest entries into the printer lineup are the X350 Digital Roll-to-Roll Press and the CP950 Envelope and Packaging Printer.

Afinia X350 Digital Roll-to-Roll Press

The next generation of roll-to-roll label and flexible packaging printers with durable pigment inks, large ink and media capacities and fast print speeds, the X350 provides a combination of production capability, footprint size, and economy not found in compact desktop or large, expensive commercial presses.

- Achieve durable full-color prints with aqueous pigment inks.
- Ideal for print volumes from 20,000–500,000+.
- Max Print Width: 12.77 in (324.4 mm)
- Up to 25m/min print speed.
- Small footprint, low energy usage.

Afinia CP950 Envelope and Packaging Printer

Industrial design and high production speed combine with exceptional image quality to produce full-color prints on a wide variety of media types. The CP950 Envelope and Packaging Printer is built with Memjet's Sirius print engine, featuring a stationary printhead for ultimate speed, quality, and reliability. Produce vibrant, colorful prints in high resolution up to 1600 DPI. Job sizes from small to large are economical, with five high-capacity 250ml CMYKK ink cartridges delivering an ultra-low cost per print.

- Achieve durable full-color prints with aqueous pigment inks.
- Max Print Width: 8.66 in (220 mm)
- Dye based ink for printing a variety of full color assortments.

CALIFORNIA LABEL PRODUCTS
Brand Identity | Label Solutions

AFINIA DIGITAL FINISHERS

Flexo shops are familiar with presses that cost hundreds of thousands of dollars, or in some cases, upwards of a million dollars, and require a skilled operator to run the press. The average salary for an entry-level flexo press operator in the US is $30,000 (simplyhired.com). Add those together, one must generate hundreds of dollars in margin every hour to be profitable. With help from the Afinia Digital Finishers, you can stop outsourcing, and in return, bring a lower cost per label.

Afinia DLF-220 Series Digital Label Finishers

The DLF-220 and DLF-220L are all-in-one systems that unwind, laminate (DLF-220L only), digitally plotter-cut, remove waste, slit, and rewind; offering you everything you need to professionally cut and finish short-run labels from your digital color label printers.

- Laminating (DLF-220L Only)
- Knife cutting
- Waste matrix removal
- Slitting
- Rewinding to finished rolls

AFINIA DLF-220S/140S Mini Digital Label Finisher

Unwind, laminate, contour cut, remove waste, slit, and rewind in one simple process to create professionally-finished labels. These solutions are perfect for on-demand, short-run label finishing.

Convert labels into finished rolls, ready for application. The DLF's cutting process requires no physical dies. Cut paths can be varied as often as desired, giving users the flexibility to create any label shape, on the fly.

- Tabletop consolidated form factor
- Plotter-cut from a digital file (no dies)
- Ideal for short runs & proofing
- Works with pre-printed rolls

PRINTER SERVICE

CLP sells and supports a variety of thermal printing systems. These range from more common units for printing standard 4 x 6 shipping labels to more specialized printers for UPC tickets or care labels. While we are happy to provide our customers with all types of printer label and tag products, we understand that for some applications, the best option is for our customer to have their own in-plant printing system.

Our company's factory- trained technicians have expertise in multiple hardware and software platforms. This allows California Label products to offer and support a diverse variety of in-plant printing solutions. With support such as on-site repairs and servicing, our customer satisfaction is unmatched.

BLANK INKJET LABELS

Here at CLP, we are proud to offer blank inkjet labels to help with your printing needs. We often produce custom-to-order blank inkjet labels, which can be digitally cut and developed for smaller runs, or die-cut for larger production.

Custom Blank Inkjet Labels

We can supply you with custom shaped blanks to print your labels at your own pace, bringing production costs to a minimum. We have a variety of material in hand such as:

- White matte paper
- White semi-gloss
- Rainbow Holographic
- Clear BOPP
- White gloss BOPP
- Silver BOPP
- White matte BOPP

Production At Your Own Pace

We pride ourselves in our knowledge and expertise when it comes to labels. We can produce useable labels for almost any type of roll, or even fan fold fed printer.

BLANK THERMAL LABELS

CLP supplies thermal labels to some of the largest brand-owners and logistics companies in the U.S.. Our large warehouses allow us to manufacture labels in large quantities and pass the savings to our customers. Our thermal labels can be shipped fan-folded or on rolls. We offer multiple adhesives for different usage environments. We have many dimensions in stock and even more die sizes available for custom orders, from the common 4" x 6" to much smaller sizes such as 1.25" x 0.25". Please call us today for more information or a quick price.

Thermal printing is the most popular method of printing carton and shipping labels. More durable and cost-effective than toner-based laser printing, thermal printing has steadily gained popularity since its invention in 1972. There are two distinct type of thermal printing: direct thermal and thermal transfer. quotation.

Thermal Transfer Adhesive Labels

Thermal transfer printing transfers ink from a plastic carrier ribbon to the label material. This tried and true printing method can be extremely versatile by using various label material/ink combinations. CLP provides several thermal transfer label materials to suit different applications, such as TT paper, semi-gloss paper, and BOPP film. Our thermal transfer labels pair perfectly with our high-quality thermal ink ribbons.

Direct Thermal Adhesive Labels

Direct thermal labels contain a special coating that changes color when heated by the thermal printer. In previous years, direct thermal was shied away from because of its subpar quality when compared to thermal transfer. In the last decade, direct thermal materials have made significant advancements that put its print quality on par with thermal transfer in many cases. CLP offers high-quality direct thermal labels in three grades: good, better, and best. Best is our Scuff-Coat direct thermal. Ask us how this product can help you with reducing or eliminating carton label deductions and chargebacks.

CALIFORNIA LABEL PRODUCTS
Brand Identity | Label Solutions

THERMAL TRANSFER RIBBONS

CLP offers a variety of thermal transfer ribbons to meet any industry's demands. Our high-grade thermal transfer ribbons are compatible with all major printer makes and models including Zebra, Printronix/TSC, Citizen, and Honeywell (formerly Datamax).

Wax Thermal Transfer Ribbons

Wax ribbons make up the largest portion of the the thermal transfer ribbon market. They are inexpensive compared to their Wax-Resin and Full Resin counterparts but provide a very dark print quality. The Wax category of ribbons provides a limited durability life and are the perfect choice for printing labels that will have a measured use life and not be exposed to harsh elements. These applications include shipping labels for cartons, UPC labels, and price labels, among others.

CLP offers two performance levels of Wax ribbons: Standard and Premium. Our Premium Wax ribbons are resin-enhanced to offer greater print durability and resistance to scuffing.

Wax-Resin/Full-Resin Thermal Transfer Ribbons

The Wax-Resin category of ribbons has a significant increase in durability over the Wax category. These ribbons are the right choice for printing labels that will have an extended period of use or that require more durability. This could include shipping carton labels that will be exposed to harsh conditions or labels for semi-permanent, reusable items such as totes. CLP offers two performance levels of Wax-Resin ribbons: Standard and Premium.

Full Resin ribbons offer the maximum amount of durability and can achieve a virtually permanent print life when combined with certain label materials. Some examples of applications that could require Full Resin ribbons include asset labels, warehouse shelving labels, and care/content sewn-in labels for garments. CLP offers various models of Full Resin ribbons for different industry-specific cases.

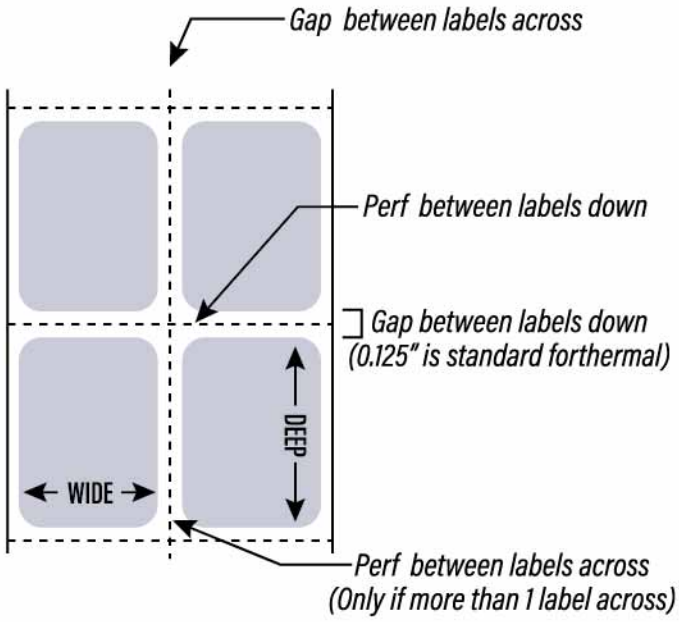
BASIC LABEL SPECIFICATIONS

If You're Confused Between 4" x 6" And 6" x 4", Use The Following Chart As A Reminder:

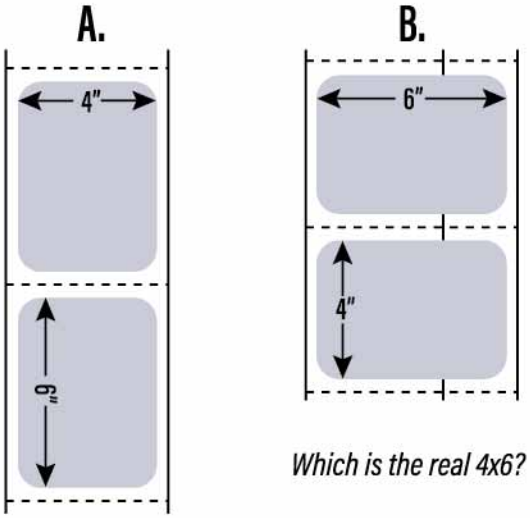
Remember The Industry Standard:

When referring to label dimensions, ALWAYS refer to the width first, then the depth.



Does It Really Matter?

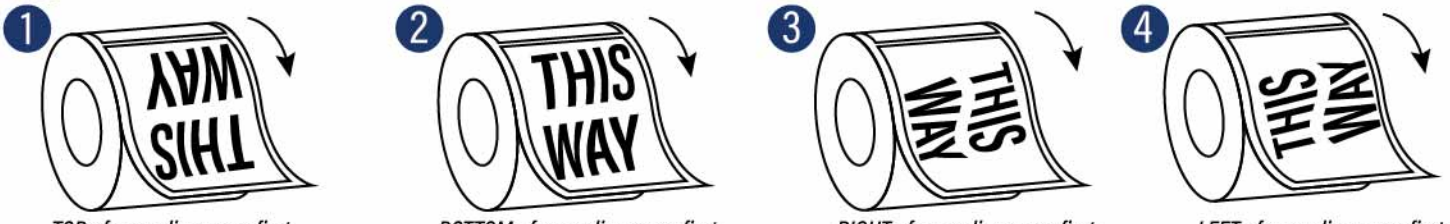
If your customer needs 4x6 labels and you order 6x4s, you will both be in trouble!
Most 4" printers cannot accept 6" wide stock.
Be sure you order properly--width first, then height.



Which is the real 4x6?

Don't Let A Job Go Wrong At Finishing Time. Be Sure You Order The Correct Copy Position, Have Your Customers Circle The Right One.

Copy Positions 1-4- Labels Wound Out



Copy Positions 5-8- Labels Wound In

LABEL APPLICATORS

CLP can help get you the perfect applicator for your products. We have label applicators that can apply adhesive labels to flat surfaces or cylindrical shapes such as glass bottles or aluminum tumblers.

Bottle-Matic 10 Label Applicator

The Bottle-Matic 10 is the perfect machine for labeling your cylindrical containers! It will wrap your beer and winebottles, cans, tubes and jelly jars. You can label objects ranging from 1/2" to 6" in diameter.

- Label products at speeds of 1200 pieces an hour
- Designed for cylindrical items from .5" – 6" in diameter, and from 2" – 9" in container height
- Holds 1/64th" side-side accuracy on most containers

Flex-Matic Label Applicator

The Flex-Matic label applicator enables the user to label all kinds of flat objects by simply setting the desired spacing using the digital readout and guides, then inserting the flat object. Once the object is inserted, the label is automatically applied. Now insert the next one, as fast as you feed the machine, it will label!

- Label: Bags, envelopes, pouches, PCB's
- Designed for cylindrical items from .5" – 6" in diameter, and from 2" – 9" in container height
- Features an 11-3/4" width, and up to 1/4" thick max, object labeling capabilities

Flex-Matic Flat Label Applicator

Dispensamatic's Flex-Matic Flat Label Applicator enables the user to label all kinds of flat objects by simply setting the desired spacing using the digital readout and guides, then insert the flat object, to automatically place the label!

- Label objects ranging from 2" to 11-1/2" wide, and up to a 1/4" thick
- Label products as close as 7/8" from the leading edge

Brand Identity | Label Solutions

AFINIA LABEL APPLICATORS

The A200 is a semi-automatic labeling machine designed for applying labels on rolls to bottles, cans, jars, and other types of cylindrical containers. Both single and front-and-back labels can be applied with a simple push of a button, or with the included foot pedal.
The AF200, working similar to the A200, is a semi-automatic labeling machine designed for applying labels specifically to flat-surfaced containers.

Afinia A200 Bottle Label Applicator

A convenient online calculator tool is included to quickly and accurately determine the necessary values for proper spacing on front and back labels, such as those commonly found on wine bottles. These values can easily be entered, saved, and recalled with the intuitive LCD display. Up to 10 preset configurations can be saved on the A200.

- Designed for bottles, cans, and jars.
- Apply one or two different labels per container.
- Control with button or foot pedal.
- Reliable ultrasonic gap sensor.

Afinia AF200 Flat Surface Label Applicator

Intuitive setup and operation allows for perfect placement. A convenient online calculator tool is included for quick and accurate values and proper spacing of labels. These values can easily be entered, saved, and recalled with the intuitive LCD display. The ultrasonic media sensor is easily trained to detect gaps in a wider range of media than mechanical flag sensors common in other applicators, allowing the AF200 to perform consistently—even on thin materials.

- Designed for flat or nearly-flat surfaces.
- Apply one or two different labels per container.
- Control with button or foot pedal.
- Reliable ultrasonic gap sensor.

AUTOMATION EQUIPMENT

CLP is an authorized provider of Colamark Automation Equipment. These innovative solutions provide high speed, fully automated application of labels to a variety of packages. These systems are ideal for food, beverage, cannabis, pharmaceutical, and cosmetics manufacturers. Real time printing of additional information such as dates and lot numbers is aloso available.

PA6000 Vertical Labeling System with Rotary Table for Pre-Roll Tubes

PA6000 enables real time printing and application of labels on to product packages. Information such as serial & batch numbers, product ID's, packaging data, production & distribution data, etc. can be printed to the label in characters, or 2D codes, or even in the form of RFID.

- Fallen bottle diversion mechanism to avoid jamming
- Optional turn-table allowing smooth material feeding & collection

PA6300 Print and Apply System

PA6300 enables real time printing and application of labels on to product packages. Information such as production data, serial & batch numbers, anti-counterfeit numbers, unique product ID, packaging data, and distribution channel data etc. can be printed to the label in characters, barcodes, 2Dcodes, or even in the form of RFID. Automatic application of these information on-line enables effective track and trace of the products in the subsequent distribution channels.

- High speed operation at up to 500 bmp
- Vertical transportation of bottles in the full cycle, good for thin bottles that cannot stand stably by itself during transportation

AUTOMATION EQUIPMENT

Colamark
Automation Equipment

A101P Vertical Wrap-around Labeling System

The A101P is a simple wrap-around labeling system specifically designed for the need of labeling on small vials. Includes an optional inspection and rejection device for missing or wrong code and missing labels to ensure output quality.

- Choice of different label adaptors to cater for the different production environment needs (tamp-on, blow-on, brush-on, corner-wrap, etc).
- Compatible with most label editing software in the market.

A105 Vertical Labeling System with Rotary Table for Pre-Roll Tubes

A105 is specially designed for high speed and precision labeling on ampoules, vials, and other thin bottles that cannot stand stably for transport. Its unique mechanism effectively avoids bottle breakage thus allowing smooth operation at very high speed.

- Choice of different label adaptors: Tamp-on, blow-on, brush-on, corner-wrap and more
- Simple installation: Specially designed mounting stand with wide adjustment range for simple installation and easy adjustment

PROTECT YOURSELF

Protect your brand's reputaion with authentification labels. This is especially important withinin the cannabis industry where compliance is crucial. With authentication labels, your customer may rest assured they are purchasing legitimate and safe products.

HoloShield® Tamper Proof Holographic Labels

State laws now require all cannabis products to be registered in a track and trace database. Here at CLP we offer Holoshield® products, with secure and comprehensive track and trace solutions. Holoshield combines material and information-based elements to confirm sensitive products are legitimately produced and sourced, which then follows a defined path through the supply chain. Holoshield® Holographic Seals offer cost efficient security, branding and authentification to packaging of medical or adult-use product.

Holograms verify:

- Certification
- Testing
- Warning
- Terpene profiles
- Plant DNA genetics
- Cannabanoid levels and effects

NICELABEL® SOFTWARE

The NiceLabel Label Management System standardizes your entire label printing process into one platform. Utilizing the familiar Microsoft Operating System, It includes everything you need to transform your labeling processes.

NiceLabel's Label Management System includes a label designer, document management system, application builder, web printing system (for manual printing), integrated printing system, a non-production environment and a change and transport system. It scales from five users to thousands and can be extended to remote locations, suppliers or contract manufacturers.

NiceLabel® Software

Loftware™
NiceLabel

Easily design bacodes within minutes. Label Cloud includes a built-in label designer that delivers a familiar Microsoft Word-like user experience. You can quickly design professional labels and multi-page supply chain documents, such as delivery notes, packing slips and invoices. No IT help, barcoding knowledge or designer training necessary.

Label Cloud contains a centralized storage system for all of your labels. Access the latest, up-to-date label templates anytime, anywhere, from a web browser.

Designed to meet the needs of businesses of all sizes, Label Cloud also enables you to integrate printing with your ERP system or other cloud or on premise business applications, such as SAP, MS Dynamics, Workday, and Netsuite just to name a few.
